## TECHNOLOGY SERVICES

Combining the assurance of proven experience with the pulse of innovation, providing unrivaled IT and telecommunications support.

Unlock the potential of innovation with Tigua Technology Services Inc. (TTS), an SBA 8(a)-certified powerhouse propelling the Professional, Scientific, and Technological Services sector forward with cost-effective solutions. Our highly skilled brigade of engineers and technicians harness emerging technologies, delivering a strategic edge to both government and private enterprises. Our unparalleled expertise in deploying, optimizing, and maintaining sophisticated IT & Telecommunication networks catalyzes your growth in the digital arena.

Our esteemed recognition by the National Agency Check (NAC) empowers TTS with an exceptional bidding advantage, opening avenues to burgeoning federal opportunities. With TTS, the future of technology is at your fingertips, fueling your success with an exceptional blend of innovation and reliability.

- **SBA 8(a) certification**
- **DOD Indian Incentive Program**
- **Eligible for direct sole source awards - unlimited value / justification and approval only after \$100 million**
- **Bonding level is \$25 million (single) to \$100 million (aggregate)**

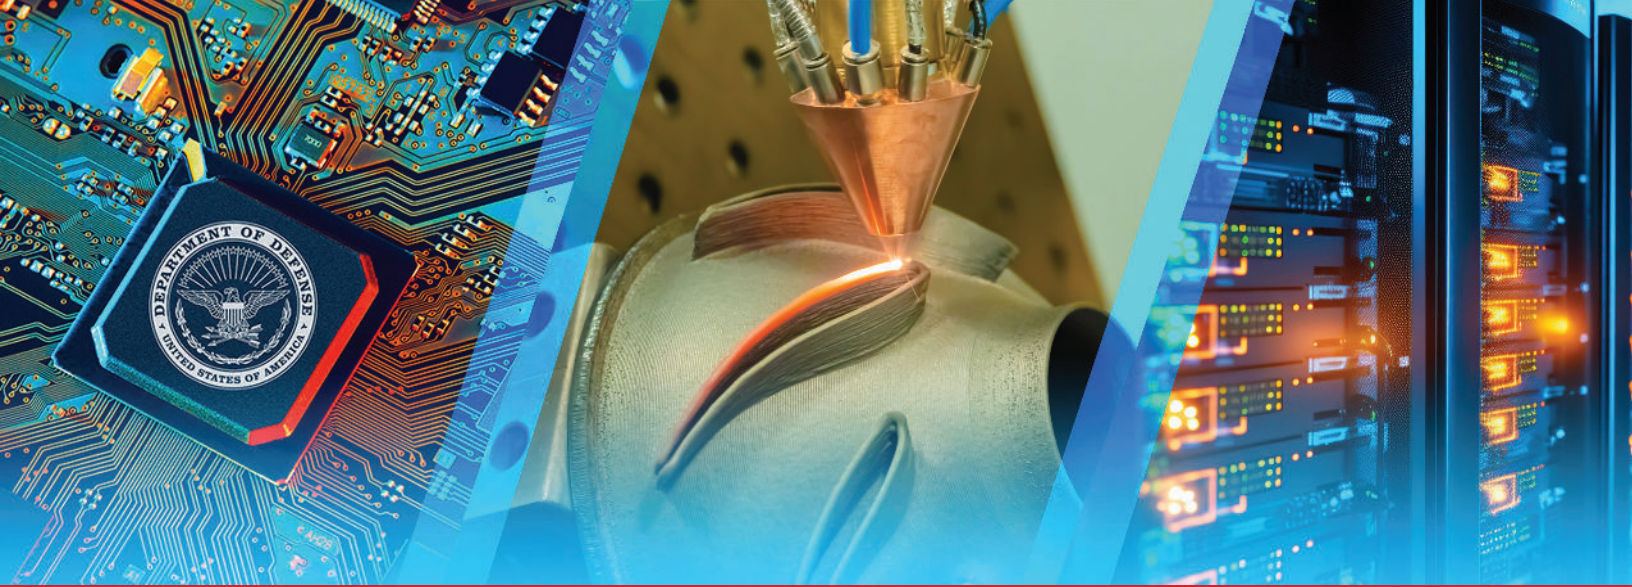

## MISSION SUPPORT

### U.S. NAVAL OBSERVATORY Science & Technology Support

Delivering expert support to the U.S. Naval Observatory (USNO) in the realms of timekeeping and astronomical research, Tigua Technology Services stands at the forefront of innovation and precision. Our highly skilled professionals and unwavering commitment to excellence enable us to advance scientific knowledge and technological reliability, thus aligning with the strategic objectives of the USNO. As we continue to drive scientific breakthroughs and enhance service delivery, our role in supporting USNO's mission of providing critical services to the U.S. Navy, government agencies, and the broader scientific community remains a source of pride and motivation.

Since 2018, TTI has empowered USNO's mission by demonstrating expertise in key areas:

- **Navigation Systems:** Our innovative design and development of navigation systems provide precise positioning and real-time tracking solutions.
- **Timekeeping Solutions:** Specializing in atomic clocks, we ensure accurate time references and reliable synchronization across diverse environments.
- **Astronomical Research:** With extensive knowledge in astronomy and celestial mechanics, we conduct precise observations, data analysis, and support astronomical instruments.
- **Metrology and Calibration:** Tigua offers calibration services and expertise in metrology principles to ensure accuracy, traceability, and adherence to industry-specific standards.
